SUMMARY

Data & Automation Engineer with 8+ years turning complex, multi-source business data into scalable pipelines, automated workflows, and decision-ready analytics. Specialise in Databricks, Azure Data Factory, SQL, Power BI, and Power Platform, delivering multi-country data platforms across APAC. Proven at re-engineering manual processes into automated end-to-end solutions and standardising messy enterprise data into clean, reusable models. Open to remote and contract engagements focused on data engineering, automation, and analytics solution delivery.

SPECIALISED SKILLS

Data Engineering: Data Engineering: Databricks (Delta tables, PySpark, Spark SQL), Azure Data Factory, SQL (SSMS), Power Query / M, data modelling, pipeline design

Automation: Power Automate, Power Platform, SAP data extraction, REST API integration, reusable function libraries, workflow optimisation

Programming & Data Wrangling: Python (PySpark, Pandas), SQL, DAX

Analytics & BI: Power BI (DAX, semantic models), dashboard architecture, KPI frameworks, Tableau

Platforms & Ops: SharePoint, Azure DevOps, ServiceNow, IVANTI, Advanced Excel

Data Practices: Data cleaning, data governance, data standardisation, master data consolidation

PROFESSIONAL EXPERIENCE

BASF ASIA PACIFIC SERVICE CENTER

KUALA LUMPUR / MALAYSIA

Senior Specialist (Data & Automation), Global Supply Chain Excellence

Aug 2024 – Present

- Re-engineered a legacy Excel-macro task into an end-to-end automated SAP → Databricks → Excel pipeline (extraction, PySpark transformation, auto-generated output), cutting runtime from 4 hours to ~10 minutes daily (~96% reduction, ~950+ hours/year — roughly half an FTE), freeing a 4-person team in another SDU to refocus on core license-release work.
- Built and consolidated a multi-country data platform across 8 APAC markets (ANZ, JP, VN, MY, TH, KR, IN, ID), unifying 3 fragmented source systems into standardised master tables for customs' reporting and cutting reporting turnaround by ~94%.
- Led migration of legacy workflows into Databricks Delta tables and Azure Data Factory using PySpark and Spark SQL (multi-table joins, timezone-aware dynamic date logic, dedup and audit timestamps), improving refresh reliability and scalability and reducing manual processing effort by ~98%.
- Engineered an API-to-analytics pipeline integrating an external logistics API (secrets-managed auth) across 3 endpoints, then cleaned deeply nested JSON with Pandas (explode, json_normalize, pivot_table) and standardisation mappings — consolidating 40+ inconsistent field labels into ~10 clean, analysis-ready fields.
- Engineered reusable Power Query / M and PySpark functions to standardise transformations across countries, reducing rework and enforcing one consistent data model.
- Designed executive Power BI dashboards (KPI cards, navigation panels, standardised country-code coding) used for cross-regional decision-making.
- Automated recurring reporting and data-cleaning steps via Power Platform, reducing manual effort and lifting data accuracy from 65% to ~97%.
- Partnered with stakeholders and DevOps across regions on requirements gathering, documentation, and executive reporting.

SERVICE ONE SOLUTION MALAYSIA

KUALA LUMPUR / MALAYSIA

Senior Data Analyst

Aug 2022 – Apr 2024

Project: Louis Vuitton, Berluti and LVMH

- Developed and implemented interactive Power BI dashboards for daily, weekly, and monthly monitoring of team and individual service-desk KPIs.
- Collaborated cross-regionally with EMEA and AMER zones to standardise SLA formulas, improving data accuracy and consistency by 20%.
- Led a 5-person APAC analyst team, lifting team efficiency 25% through structured knowledge transfer and streamlined reporting.
- Developed IVANTI (ITSM) queries to deliver actionable insights to application owners and IT managers, improving staff performance by 15%.
- Built dashboards that consistently hit targets for 7 consecutive months and reduced average resolution time by 15%.

BON VOYAGE LOGISTICS MALAYSIA

KLANG / MALAYSIA

Customer Service Executive

Mar 2020 – Mar 2022

- Collaborated with Sales, Customer Service & Finance team to create reporting presented to stakeholders by using Sysfreight (CRM) database, Excel & Power BI.
- Identified estimated target sales & market prediction by data extraction & data mining using Sysfreight (CRM) & Excel with achieving 95% of their target sales goals.
- Organised APAC offices' data combine to negotiate 10% lower ocean freight monthly rates for Transpacific & Latin America trade lanes with major shipping companies.

LEADERSHIP EXPERIENCE

ST. JOHN AMBULANCE OF MALAYSIA

KLANG / MALAYSIA

Area Honorary Secretary; Certified First Aid Trainer

Jan 2011 – Oct 2017

- Produced 30+ Grand Prior Award holders annually to resolve the low number of holders by data extraction from Access database, data filtering & created Pivot Table in Excel and presented to stakeholders.
- Reduced typo error by 98% using data from Access database & data filtering in Excel, created over 1000+ printing certificates using Word & custom nametags with Publisher.
- Led a team of 5+ integrating Google Spreadsheet data from Google Forms to be applied for First Aid Examination Application, reducing the time by 8 hours instead of 300+ hours.
